

Main Feature	
PRODUCT / CATEGORY	OVEN / GAS Oven with Gas Grill with Fan
Installation type	Built- in
Size (cm)	90 X 60 CM
COOKING FUNCTIONS	4 FUNCTIONS
Finish	Black Glass Frontal Finish
CAVITY VOLUME	66 L
TYPE OF CONTROL	KNOBS
Ignition	Automatic
COLING FAN	YES
OVEN FAN	DOUBLE FAN
TURNSPIT	YES
Lamps	yes
Voltage	220-240V
Frequency	50-60Hz
Total Power	2400W
Cable	yes
Plug	no
Product Dimensions HxWxD	595 x 897 x 532
Required Niche Size (HxWxD)	588 x 865 x 560
Packaging Dimensions	662 x 972 x 665
Net/Gross Weight	52/55
Country of Origin	Italy

COOKING FUNCTIONS

LOWER BURNER

The heat is coming from the base of the oven. There is no fan working with this function. This is great for slow cooked foods such as Casseroles and Large Roasts.

GAS GRILL + TURNSPIT

The suitable function for fast and deep grilling or to brown and roast meats in general - fillet steaks - grilled fish and also grilled vegetables.

FAN ASSISTED

The benefit to using the Fan Assisted function is to evenly distribute heat through the whole oven cavity. The rear fan circulates the air. Fan Assisted is most beneficial when doing batch baking and multi level cooking.

FAN

This function allows you to fan defrost at an ambient temperature. Unlike defrosting using your microwave this mode does not dry or par-cook food.
